FLASHLIGHT SHARK SEARCH

MATERIALS NEEDED:

- Black construction paper
- Dry erase markers or permanent markers
- Large plastic storage bag (In an effort to conserve our oceans, we suggest reusing a plastic bag that you have around your home)
- White paper
- Seascape shark scene template
- Flashlight template (print on cardstock for a more durable flashlight)
- Scissors

DIRECTIONS:

1. Slide the white sheet of paper into the plastic bag. This will allow you to see what you are drawing, once you begin coloring.
2. Using the permanent markers, draw and color in the underwater seascape of your shark. We have attached a template of the seascape that we used so you can trace over it. The more color, the better!
3. Slide the white paper out of the bag and slide the black construction sheet into the bag.
4. Cut out the flashlight template.
5. Slide the flashlight and beam into the bag with your flashlight sticking out of the opening of the bag, backside
6. Move your flashlight around and see what is lurking in the depths of the ocean!
7. You can even use the backside of the bag for a second ocean scene!

Here is a finished example of the flashlight shark search!
Use these to build your own Shark Reef!

- Bluntnose sixgill shark
- Australian ghost shark
- Carolina Hammerhead Shark
- Port Jackson Shark Egg
- Ghost Shark Egg
