

# GREENSBORO SCIENCE CENTER

## Nature Tots Fall 2020

Fall into science with our fun learning series for kids ages 3-4. Each week features activities that may make a mess, so dress accordingly. Choose a five- or seven-class punch card to attend any combination of classes. Remember, you must stick to your class time (10:00-11:00 a.m. or 1:30-2:30 p.m.) and day (Tuesday or Wednesday). Need to add a class? Just email the Education Office at [camps@greensboroscience.org](mailto:camps@greensboroscience.org). Registration is required at [www.greensboroscience.org](http://www.greensboroscience.org).

- 1. Red Panda Day!** **September 29 and 30**  
It will be panda-monium as we learn about our bamboo-eating Red Pandas, Tai and Usha. Why do they have such a fluffy tail and what is the black spot on Tai's snout?
- 2. 3, 2, 1! Blast Off!** **October 6 and 7**  
Join us as we blast off into space to explore our solar system. We'll read a fun space story and make air-powered rockets to shoot to the moon.
- 3. Dinosaur Romp** **October 13 and 14**  
Let's learn about plant eaters and meat eaters as we investigate dinosaurs. Take home a dino craft and sort some fossils for clues from the past. You'll also meet a few living dinosaur relatives.
- 4. Amazing Apples** **October 20 and 21**  
Join us for a bushel of science fun as we learn all about apples. From printing to tasting and graphing our investigations we'll get to the core of apple science.
- 5. Potion Commotion** **October 27 and 28**  
Halloween is just around the corner so let's mix up some concoctions for the occasion. Get ready for slime time, bubbles galore and wicked reactions. Dress-up is welcome this week.
- 6. Insects and Spiders** **November 3 and 4**  
What makes an insect an insect and a spider a spider? Which one uses spiracles to breath? Which one likes a "cricket milkshake"? Let's explore their differences and similarities as we meet a few that call the GSC home.
- 7. Who, Who, Who!** **November 10 and 11**  
You guessed it! This week is all about owls. Explore all the cool owl adaptations that allow them to hunt at night as we meet Aspen, our eastern screech owl. We'll dissect a fake owl pellet to investigate what an owl eats and take home an owl craft.
- 8. Colorful Fun** **November 17 and 18**  
The season of color and light is almost upon us. Red, blue and yellow- what happens when mischievous mice investigate colors? We'll read a story, do some mixing to explore the world of color and play with light. Enjoy more color and light at Winter Wonderlights, our holiday light show experience in the zoo. Visit <https://www.greensboroscience.org/> for ticket information.
