

Nature Tots Fall 2022

Fall into science with our fun learning series for kids ages 3-4 with one accompanying adult. Each week features activities that may make a mess, so dress accordingly. Choose a five- or seven-class punch card to attend any combination of classes. Remember, you must stick to your class time (10:00-11:00 a.m. or 1:30-2:30 p.m.). Need to add a class? Just email the Education Office at camps@greensboroscience.org. Registration is required at www.greensboroscience.org. **No class on November 8.**

- 1. Red Panda Day!** **October 4**
It will be panda-monium as we learn about our bamboo-eating red pandas, Tai, Usha and baby Ravi. We'll make a fun red panda mask that we can wear during our chat with the red panda keeper.
- 2. Autumn Adventures** **October 11**
Colorful leaves, falling acorns and shorter days mean fall is in the air. Let's explore the Science Center campus to collect leaves and acorns for a fun nature craft.
- 3. Fabulous Flamingos** **October 18**
Join us as we learn all about these beautiful pink birds. What makes them pink and why do they stand on one leg? We'll make a fun flamingo craft and then parade down to Revolution Ridge to visit our flamingo flock.
- 4. Halloween Happenings** **October 25**
See how animal adaptations help with disguises in this friendly approach to Halloween. You'll meet a not so scary spider and a friendly furry friend, plus make some gooey slime. Dress-up is welcome for this class.
- 5. Out of This World** **November 1**
The sky's the limit in this class. We'll travel to worlds beyond as we explore the stars, planets and much more.
- 6. Farmyard Fun** **November 15**
Make some fun farm crafts as you learn about our own Friendly Farm. We'll churn some butter, meet a chicken, and feed the goats and sheep in the farmyard.
- 7. Building Bonanza** **November 22**
From LEGO DUPLO® animal habitats to bridges and mazes, try your hand at a coordinated effort to build and create.
- 8. Sea Life** **November 29**
Let's "dive" in the watery world of oceans to discover what lives in them. We'll learn about seaweed, jellyfish, sharks and more, make a fishy craft and take home an aquarium scavenger hunt to do with your family during your next visit to the GSC.
